LIBRARY

This Directory is primarily to facilitate the work of those engaged in reforestation activities. Data was collected and furnished in an effort to develop, as much as possible, a comprehensive source for forest tree seedlings.

The previous edition of this Directory was produced in 1981, and contained 305 entries. This version lists 356 nurseries.

This Directory is just another example of the cooperative spirit and long working relationship mutually enjoyed by the American Association of Nurserymen and the United States Forest Service.

The following is a list of the names of the persons who have been elected to the office of the President of the National Association of Agricultural Librarians and Documentalists for the year 1960. The names are listed in alphabetical order of their last names.
